UETDRCD001

Work safely around powerlines as an ordinary person

This nationally-recognised unit of competency provides students with skills and knowledge to apply safe work practices when working in the vicinity of live electrical apparatus as an ordinary person.

Many industries and/or job functions require this course for site access, licensing and authorisation, for example, construction, civil, vegetation management, telecommunications, scaffolding, rigging, spotter / observer, painting.

PST can work with you prior to your training day, making the course relatable and have job specific discussion points, so your staff can better understand requirements for working safely near powerlines and apply it to their daily duties.

+ Accreditation

On successful completion of the course, you will be awarded the nationally recognised unit of competency **UETDRCD001 WORK SAFELY AROUND POWERLINES AS AN ORDINARY PERSON**
